

THE FOUNDING ROUND

The *Kilo*.

A founding cohort of one hundred.

FIRST CLOSE • Q3 MMXXVI

TACC PTE LTD • SINGAPORE

One hundred principals. *Not a market.*

The Founding Round admits one hundred members. When the cohort is full, it is full. Each seat carries the same instrument, the same custody, the same waterfall. There is no preferred class. No side letter. No second tier.

Members are addressed by number. Discretion is structural, not promised.

TIER

00

SIDE LETTERS

The rules of money *are being rewritten.*

Sovereign debt is at unprecedented peacetime levels. Central banks are accumulating gold at the fastest pace in fifty years. Reserve currency assumptions, once unspoken, are now openly questioned in the institutions whose business it is to defend them.

~1,180 t

Central bank gold purchases

Annual avg., recent cycle. Multi-decade high.

> 100%

US debt-to-GDP

Sustained above the prior post-war peak.

Real-asset allocation

Institutional consensus on rising portfolio share.

Our parents learned this lesson in 1997. The world is being taught it again.

Gold is the baseline. *Not the allocation.*

In conventional portfolios, gold is a five-percent hedge against the other ninety-five. Here the relationship inverts. The kilogram is the monetary floor — every position is constructed above it, financed against it, underwritten by it.

The hedge is the foundation. Everything else is the building.

01 · FOUNDATION

1 kg LBMA Gold · Allocated

A DOMESTIC GOLD ACCOUNT

- Unallocated paper claim
- Bank balance-sheet exposure
- KRW-denominated counterparty
- Static. No yield.

THE KILO

- ◆ Serial-numbered allocated bar
- ◆ Held outside any bank balance sheet
- ◆ Singapore VCC · LBMA · FTZ
- ◆ Productive collateral. Three engines.

One kilogram.

LBMA Good Delivery.

Each member's bullion is held in allocated, segregated custody at Malca-Amit Singapore Free Trade Zone. Bars are serial-numbered, refiner-certified, and audited.

SPECIMEN BAR REGISTRY

Format	1 kg cast bar
Fineness	999.9
Standard	LBMA Good Delivery
Custodian	Malca-Amit SG
Location	Singapore FTZ
Allocation	Segregated · Member
Audit	Annual · Independent
Insurance	Full replacement

No rehypothecation. No pooled account. No paper claim. Full custody, full custody; full bar-list disclosure to admitted members on funding. Custody terms governed by the Custody Agreement with Malca-Amit standing in for the bar.

A jurisdiction *that keeps its word.*

The Variable Capital Company is Singapore's purpose-built private fund vehicle — regulated by the Monetary Authority of Singapore, ring-fenced by statute, recognised across the major treaty network. For Korean principals, Singapore is the shortest distance between Seoul and a rule that does not change.

01

VCC Statute

Purpose-built fund vehicle. Ring-fenced sub-funds. Managed by a Singapore-licensed fund manager.

02

MAS Oversight

Regulated by the Monetary Authority of Singapore. AML/CFT regime aligned with FATF standards.

03

No GST on Bullion

Investment-grade gold is exempt from GST. FTZ custody held outside the customs boundary.

04

Treaty Network

Comprehensive double-taxation agreements across Korea, Japan, Hong Kong, and the major jurisdictions.

Gold collateralises. *Credit deploys.* Discipline returns.

The kilogram is pledged to a senior credit facility at a maximum loan-to-value of seventy-five percent. Drawn capital is deployed by the investment committee into private credit and select pre-IPO positions. Yield, principal, and metal appreciation flow through the waterfall. The collateral does not move.

01 • Collateral <i>Allocated Gold</i> 1 kg LBMA bars per member. Malca-Amit Singapore FTZ. Segregated, serial-numbered.	02 • Facility <i>Senior LTV Line</i> Pledged against the gold pool. Drawn against the LBMA reference price. > Floating-rate institutional terms.	03 • Deployment <i>Private Credit + Equity</i> Investment committee selects sleeve-by-sleeve. Diversified across > private credit and pre-IPO positions.	04 • Waterfall <i>Returns Distributed</i> Capital first. Hurdle next. Catch-up. Carry above. European-style > waterfall.
100% Custody	≤ 75% LTV	15-25% Gross Tgt	8% Hurdle • 20% Carry

Target deployment ranges shown are illustrative, gross of timing, and dependent on facility cost, deployment performance, and gold-price path. They are not a forecast or guarantee. Past performance, where cited, does not indicate future results.

COLLATERAL REMAINS IN CUSTODY THROUGHOUT • THE BAR DOES NOT MOVE

Three engines. *One waterfall.*

~15% TARGET NET IRR
ILLUSTRATIVE · NOT A GUARANTEE

01 <i>Gold Appreciation</i> Real-asset value on the unencumbered base. Independent of currency revision and counterparty risk.	02 <i>Private Credit Yield</i> Contractual yield on deployed capital. Targeted gross 15–25% across the deployment book, sleeve-selected.	03 <i>LTV Arbitrage</i> Spread between the cost of the senior facility and the yield of deployment. Engineered, not market-timed.
--	--	---

2.0%	8.0%	100%	20%
MGMT P.A.	HURDLE	CATCH-UP	CARRY

Target IRR is gross of timing assumptions and dependent on facility cost, deployment outcomes, and gold path; provided for illustrative purposes only. European waterfall: management fee on committed capital, preferred return paid in full before manager catch-up, carry above the hurdle. Full mechanics in the PPM, Section 9.

What happens if gold moves?

Reference: 1 kg subscription, facility drawn at 67% LTV at inception.

SCENARIO	LTV POSITION	MARGIN POSTURE	MEMBER CAPITAL
<i>Drawdown</i> Gold -20%	~84% Through the 80% bank threshold; cash reserve deployed to bring facility back to band.	Margin Call Bank action triggered. Manager deploys 20% reserve before any member capital call.	Buffered Member capital protected by reserve. Calls capped at 100% of original commitment.
<i>Reference</i> Gold flat	67% Within target band. No alert. Drawdown reserve unused.	Stable No bank action. No member alert. Standard quarterly reporting.	Unaffected Position remains held. Distributions continue per waterfall.
<i>Appreciation</i> Gold +20%	~56% Comfortably below ceiling. Additional headroom available for selective deployment.	Headroom Facility under-utilised relative to collateral value.	Compounding Gold appreciation flows to NAV. Engines 1 + 3 amplified. Engine 2 unchanged.

A -20% gold move is absorbed first by the cash reserve. The covenant is not "no margin event ever" — it is "the manager handles it before you do".

Scenarios are simplified arithmetic illustrations using the indicated covenant bands and are not predictions or projections. Actual outcomes depend on facility cost, the prevailing LBMA reference price, the deployment book, and timing. Capital calls under the Subscription Agreement are capped at 100% of original commitment.

The covenants *are the product.*

- ◆ Loan-to-value capped at **75%** under normal market conditions.
- ◆ **20%** fund-level cash reserve as a drawdown buffer.
- ◆ Independent custody. No rehypothecation. No related-party deployment.

- ◆ Member alert at **70%**; bank margin at **80%**.
- ◆ Capital calls capped at **100%** of original commitment.
- ◆ Quarterly audited bar inventory. Annual independent verification.

Principals

you can check on.

The fund is managed by principals with backgrounds in US private market deployment and Korean cross-border placement. Operations are independently administered and independently audited. Names and full track record are made available to admitted members under the Subscription Documents.

P

THE PRINCIPALS

Investment Committee

US private market deployment. Korean cross-border capital placement. Custody and structuring across LBMA jurisdictions. Full bios disclosed under the Subscription Documents.

A

ADMINISTRATION

Independent Administrator

Singapore-licensed fund administrator. NAV struck independently. Member registry, capital accounts, and subscription documentation maintained outside the manager.

V

VERIFICATION

Audit · Annual

Annual fund audit by an internationally recognised firm. Independent vault verification of physical bar inventory. Reports filed in the member document archive.

Six stages. *One seat.*
